

# BUSINESS OREGON'S INFRASTRUCTURE PROGRAMS

Business Oregon is dedicated to helping Oregon businesses and communities gain access to capital. The first step in the process is a conversation with a Regional Development Officer, who will ask questions profiling your project and its specific needs.

Business Oregon will discuss possible funding solutions from a list of programs or direct you to other funding sources or programs that best suit your situation.

Members of the Regional Development Team are ready to assist you in finding a financial solution for your project. Call a team member today or visit our website for a statewide directory.
